Profile

Final-year Computer Science student (Intelligent Systems / AI) at BINUS University, on track to graduate in 3.5 years with a 3.78 GPA. Currently completing a competitive 12-month full-time enterprise internship at PT SMART Tbk, rotating across three engineering teams — Blockchain, Business Intelligence, and Generative AI — while delivering freelance full-stack, automation, and data projects. Builds end-to-end: machine learning models, ETL pipelines, BI dashboards, LLM-powered automation, and production web applications. 1st Place winner of a national NLP competition out of 109 teams. Core stack: Python, SQL, TypeScript/React, PyTorch, LangChain, Power BI, n8n, AWS, Azure.

Professional Experience

PT Sinar Mas Agro Resources and Technology (SMART Tbk)

February 2026 - Present

IT Digital Intern, Digital Transformation — IT Digital Division | Jakarta, Indonesia

Selected for a competitive 12-month full-time engineering internship through the BINUS Enrichment Track; rotated across three product teams delivering AI, Data, and Web solutions for Upstream and Downstream operations, Finance, HR, Procurement, and IT.

Generative AI (GenAI) Engineer

September 2026 - Present

- Building a Generative AI solution end-to-end with a cross-functional team, translating stakeholder-defined requirements into a working technical implementation.
- Run requirement-gathering and iteration cycles directly with business stakeholders, keeping model behaviour and outputs aligned with real operational needs.

Business Intelligence (BI) Engineer

July 2026 - August 2026

- Rebuilt a 6-year historical reporting process into a repeatable pipeline, reducing a recurring annual effort of 1–2 months down to a single data refresh.
- Designed and built the ETL pipeline and performed multi-year data cleaning and preparation, ensuring consistent, audit-ready figures across all six years of data.
- Partnered with business stakeholders to define reporting requirements, converting a recurring manual burden into a reusable, low-maintenance reporting asset.

Blockchain Developer

February 2026 - June 2026

- Worked on **SmartTrace**, the company's blockchain-based traceability platform that traces processed palm products back to source — mill, estate, and harvest shipment records — across the supply chain.
- Led end-to-end development of an AI-assisted Supply Chain Recommendation System built on that traceability data (SAP to PostgreSQL), supporting route-selection decisions — owning recommendation logic, business rules, and system architecture from concept to implementation.
- Engineered a collaborative-filtering recommendation model trained on 1 year of supply chain transaction history, reducing manual Supply Chain Manager decisions by 80% in pilot testing.
- Gathered and analysed user requirements through recurring stakeholder discussions, translating operational challenges into scalable system features and iterating model logic weekly from structured feedback.
- Collaborated with business and technical teams through testing and validation to ensure recommendation accuracy, usability, and alignment with business objectives.

Freelance Developer & Data Consultant

June 2026 - Present

Full-Stack Development, Automation & Data Projects | Jakarta, Indonesia (Remote)

- **Full-Stack Web Development:** Designed, built, and deployed web applications end-to-end for clients — from requirements and interface design to REST APIs and database structure — using React, TypeScript, and SQL databases.
- **AI & Workflow Automation:** Built automation workflows in n8n and Microsoft Power Automate that connect business tools and eliminate repetitive manual work, including projects applying Generative AI and large language models to real business use cases.
- **Financial Data & Reporting:** Established a structured process for recording and consolidating a client company's financial data, replacing scattered manual records with a single consistent source, then prepared it into management dashboards.
- **Client-facing initiative:** Proposed and built a web reporting portal with automatically refreshing data, removing the client's routine of manually requesting updated figures and giving their customers a self-service, always up-to-date view.

Technology Project Member Mentor, Bina Nusantara Computer Club

November 2024 - February 2025

- Led a 7-member team through end-to-end delivery of a full-stack web application, achieving a 100% project completion rate.
- Implemented the Agile Scrum framework (sprints, stand-ups, retrospectives) and provided hands-on technical mentorship in modern front-end and back-end best practices.

Key Projects

Indonesian NLP Regression Model — 1st Place, DATAQUEST AIRNOLOGY 4.0

2025

- Designed a custom hybrid TF-IDF regression architecture to predict incarceration duration from noisy Indonesian court transcripts, self-teaching the approach in two weeks with no prior NLP experience.
- Outperformed transformer baselines including IndoBERT on this task while using significantly less compute, and owned team communication and technical presentation across two rounds to place 1st nationally out of 109 teams.

Tech stack: Python, Scikit-learn, Pandas, NumPy

Multi-Modal PCB Defect Detection — Top 28 of 210+ Teams, DATATHON 2025

2025

- Served as Computer Vision specialist on a multi-modal deep learning model classifying manufacturing defects on printed circuit boards, at the national datathon by RISTEK FASILKOM Universitas Indonesia.

Tech stack: Python, PyTorch, Computer Vision

Battery Remaining Useful Life (RUL) Prediction

2025

- Delivered a complete machine learning lifecycle solution forecasting battery health for industrial asset management — from Power BI data visualisation through Random Forest model development to web deployment.

Tech stack: Python, Scikit-learn, Power BI

Education

Bachelor of Computer Science, BINUS University

September 2023 - Expected 2027

Specialization in Intelligent Systems | Jakarta, Indonesia | GPA: 3.78 / 4.00 (through semester 6) | On track to graduate in 3.5 years

- Chose the Intelligent Systems specialization to go deep on artificial intelligence — machine learning, deep learning, NLP, and computer vision — on top of a strong software engineering foundation.
- Selected for the BINUS Enrichment Internship Track, a competitive 12-month full-time industry placement at PT SMART Tbk.
- Currently writing a research paper as a graduation requirement while completing the full-time internship.
- Competes actively in national competitions across data science, web development, UI/UX, and IoT, applying coursework to real problems under deadline.

Honors & Awards

- 1st Place (National)**, DATAQUEST AIRNOLOGY 4.0 NLP Competition, Universitas Airlangga (2025) — out of 109 teams • **Top 28 of 210+ Teams**, DATATHON 2025, RISTEK FASILKOM Universitas Indonesia.
- Finalist**, BASIC: Business and System Innovation Challenge (UI/UX) • **Selected Participant**, Samsung Innovation Campus Batch 7 (2025); Arkavidia Datavidia 2025; IT Fest Hackathon; Innovative UI/UX Design Competition.

Technical Skills

- Programming Languages:** Python, SQL, TypeScript, JavaScript, Java, PHP, C, C++, Swift
- AI & Machine Learning:** Machine Learning, Deep Learning, Natural Language Processing, Computer Vision, Speech Recognition, Generative AI, Large Language Models, Recommendation Systems, Collaborative Filtering, PyTorch, Scikit-learn, Pandas, NumPy
- Data & Business Intelligence:** PostgreSQL, MySQL, ETL Pipelines, Data Modeling, Data Cleaning, Exploratory Data Analysis, Data Visualization, Power BI, Tableau, DOMO, Excel
- AI Automation:** LangChain, OpenAI API, Google Gemini, n8n, Microsoft Power Automate
- Web & Mobile Development:** ReactJS, React Native, Express.js, Node.js, Laravel, Tailwind CSS, REST APIs
- Cloud & DevOps:** Amazon Web Services (AWS), Microsoft Azure, Azure Machine Learning, Docker, Git, GitHub, Blockchain Traceability
- Enterprise & Collaboration:** SAP MM, Jira, Confluence, Asana, AppSheet, Figma, Agile Scrum
- Soft Skills:** Communication, Leadership, Team Collaboration, Problem Solving, Critical Thinking, Adaptability, Time Management, Public Speaking
- Languages:** Bahasa Indonesia (Native), English (Professional Working Proficiency)

Leadership & Community

Founder & Community Leader, Mari Kita Longrun Running Community

May 2025 - Present

- Founded a running community and grew it to 900+ members in 5 months by running weekly member listening sessions and designing activities directly from that feedback.
- Executed a data-driven marketing strategy across Instagram and TikTok generating 170,000+ monthly profile views, and implemented a retention strategy and financial tracking system for long-term sustainability.

Human Resources Development Staff, Bina Nusantara Computer Club

September 2024 - October 2025

- Managed the end-to-end member development life cycle for 60+ members, planning and executing 5 technical and soft-skill programs (incl. AI Training, Figma) with 90%+ satisfaction.
- Established a data-driven feedback mechanism and pioneered 2 cross-university benchmarking programs.

Human Resources Development Activist, Bina Nusantara Computer Club

October 2023 - September 2024

- Co-designed technical programs with members from different study tracks, reconciling conflicting priorities through structured listening sessions and rapid prototyping before full rollout.

Freshmen Leader & Freshmen Partner, Bina Nusantara University

August 2024 - September 2025

- Mentored 60 new students within a 6-leader team through orientation workshops and community-building sessions, provided year-long academic mentorship to 10 students, and guided a mentee team through the full life cycle of a community-based humanitarian project.

Certifications

- Microsoft (Coursera):** Artificial Intelligence on Microsoft Azure; Azure Machine Learning • **IBM (Coursera):** Python for Data Science, AI & Development; Machine Learning with Python
- Coursera:** Deep Learning with PyTorch — Image Segmentation • **Meta:** iOS Developer Professional Certificate • **Other:** Python Programming, Samsung Innovation Campus Batch 7; C Programming, BNCC Learning & Training
